

ChairPro Endorsement / Testimonial

Last year our company was unhappy with our Wilkhahn chairs as many had lost their height and swivel adjustment ability. We didn't have the budget to replace them, and didn't know if they would be worth repairing.

Peter March from ChairPro attended our offices to test the functionality of the forty-six Wilkhahn chairs. He advised that due to the inherent quality of the chairs, with a professional repair and service, they could be restored to full working order. The chair's leather upholstery also required cleaning to restore them to prime condition.

Peter arranged for his repair-man to attend to the repairs on site. Subsequently, the chairs were serviced and the leather reconditioned which returned them to proper functionality.

Without Peter's knowledge of office chairs and constructive advice, we would not have known these chairs could be repaired, nor who to approach for such a job.

ChairPro have also generously supplied trial chairs for us to test in our office environment, and we have no hesitation in recommending their services to anyone who requires advice or assistance when looking to purchase new office chairs or access service for current stock.
