

## CHAIRPRO ENDORSEMENT:

For years, I've struggled to find the right office chair.

Previous chairs simply did not provide the lower lumbar, back support that I desperately needed. I just couldn't seem to get a chair that was "just right" for me. That was until I happened across the experts at ChairPro.

I needed a robust chair to use in my office so I contacted Peter at ChairPro and explained my situation. Peter immediately arranged for the commercial grade **Bodyline** task chair to be delivered to me for appraisal. As it happened, the chair was exactly what I required and at the right price.

My order was processed quickly and efficiently and upon receipt of my new chair, Peter clearly explained the best way to adjust it for my ideal posture support.

The **Bodyline** is as good as advised and came with a 10-year warranty.

I'm very happy now because, with proper support where it's needed the chair helps me maintain a correct sitting posture and has thereby eliminated the chair-related back pain issues that I previously had.

If you need help with your office chair, I'd highly recommend Peter & Georgi at ChairPro. They genuinely understand that everyone is different, with varying needs and concerns and they take the time to advise which chair will be specifically best for you personally and why.

I do not normally provide personal recommendations or endorsements, however with regards to ChairPro, I can honestly say that the professional expertise that Peter & Georgi provided have delivered an excellent chair that really does support me properly.

It's a great chair from a great company!
